

# d4t4tur: las estadísticas de tuRismo en Argentina

*Juan Pablo Ruiz Nicolini , Pablo Tiscornia*

**Abstract** Una experiencia de cómo implementamos flujos de trabajo reproducibles y abiertos en un equipo que trabaja y produce estadísticas públicas.

**Palabras clave:** Estadísticas Públicas - Turismo - Argentina

```
##  
## Found the following errors:  
## * Author 2: missing country
```

## R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed      dist  
## Min.   : 4.0    Min.   : 2.00  
## 1st Qu.:12.0    1st Qu.: 26.00  
## Median :15.0    Median : 36.00  
## Mean   :15.4    Mean   : 42.98  
## 3rd Qu.:19.0    3rd Qu.: 56.00  
## Max.   :25.0    Max.   :120.00
```

## Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot. (Nuncio, Luis, and Yuan 2011)
